 - Front-End Development (HTML5, CSS3, JavaScript ES6+)
 - ReactJS (Hooks, Component-based Architecture, Routing)
 - API Integration & State Management
 - Responsive Web Design & UI/UX Fundamentals
- TOEFL ITP Score: 520

WORK EXPERIENCES

PT. DUNIA MAYA COMUNICA Jan 2025 - Des 2025
Contract | System Analyst

- 1. PT. Kereta Cepat Indonesia China (KCIC) – Asset Registration Application Development**
 - Conducted requirement gathering and maintained intensive communication with stakeholders.
 - Designed the system using BPMN, Use Case Diagram, Activity Diagram, Sequence Diagram, Deployment Diagram and Wireframes to support asset registration processes.
 - Created and implemented UI/UX design, converting wireframes into interactive interfaces.
 - Developed front-end components by slicing UI/UX into code using TypeScript, ensuring responsive and user-friendly design.
 - Prepared key project documentation, including FSD, PRD, and UAT Plan.
 - Collaborated with the development team to ensure successful system implementation and user acceptance.
- 2. PT. PLN (Persero) – Digital RBM (Meter Reading Route) System Development**
 - Analyzed business requirements for a GIS-based Meter Reading Route (RBM) system.
 - Designed process flows using DFD, ERD, and Sequence Diagram to validate field survey and data collection.
 - Developed Change Requests (CR) and Functional Specification Documents (FSD) as references for developers.
 - Conducted testing and UAT with end users to ensure the system met business needs and improved survey validation efficiency.
